

Irish Security Industry Association

Seminar Invitation

Monitoring Electronic Security

Wednesday 12th October 2016
The Marker Hotel,
Grand Canal Square, Dublin 2
09:30-12:30

The Irish Security Industry Association (ISIA) would like to invite you to attend a seminar on the subject of monitoring electronic security.

The seminar speakers will provide detailed insight and overviews of exactly what needs to be considered when assessing your electronic security and what your expectations should be around response to breaches of that security.

Those who attend will receive information on:

- » How to correctly assess your electronic security requirements
- » What exactly is a monitored system? What should I expect?
- » What monitoring solutions are available and what meets the requirements of legislation
- » The impact on you and your business if your system is not correctly monitored
- » Lessons from the UK on the impact of security choices
- » Eircode – How it is improving emergency response and helping to tackle crime
